# The Plan

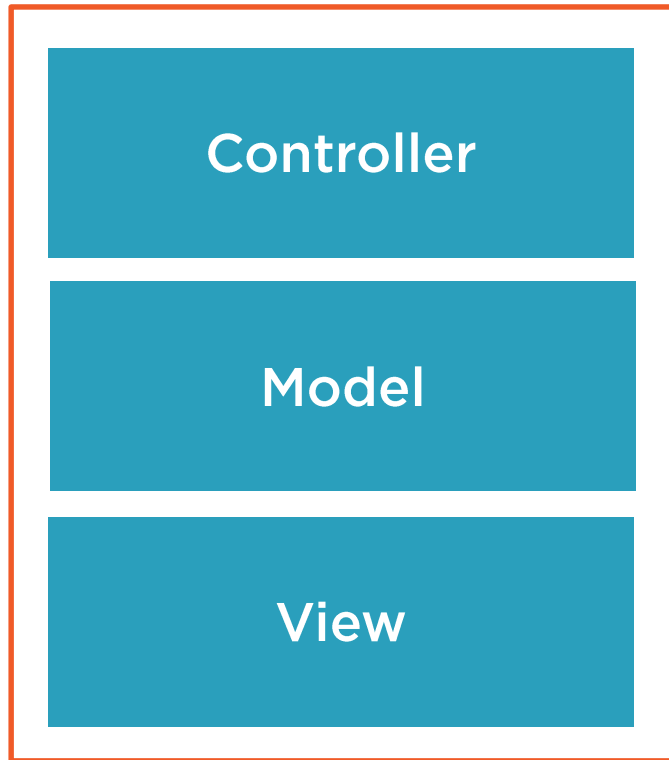

Slides

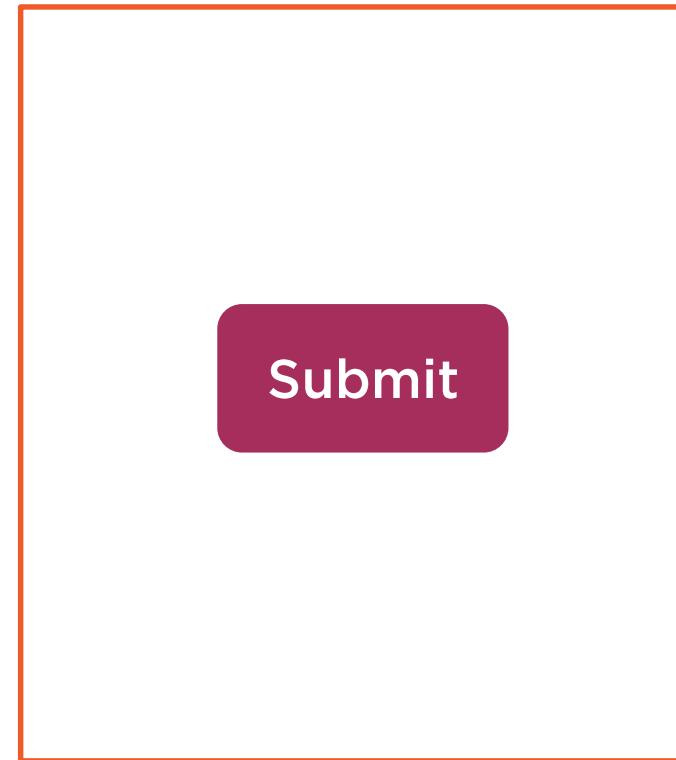

Code

# MVC

Server

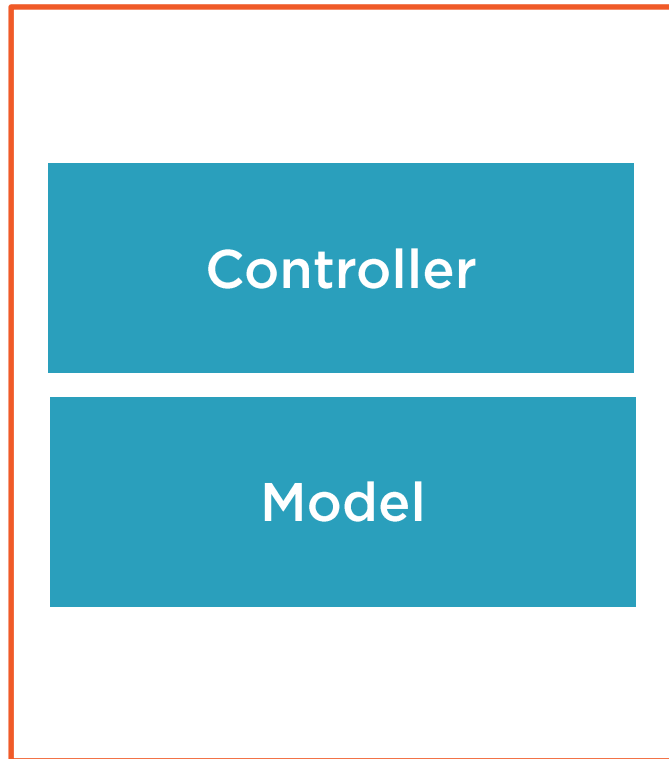

Browser

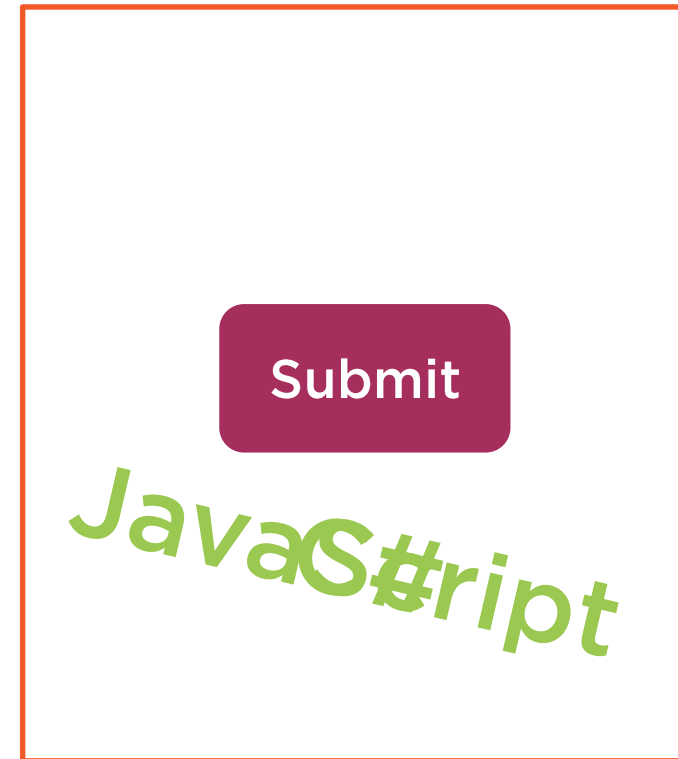

# Single Page Application

API

Browser

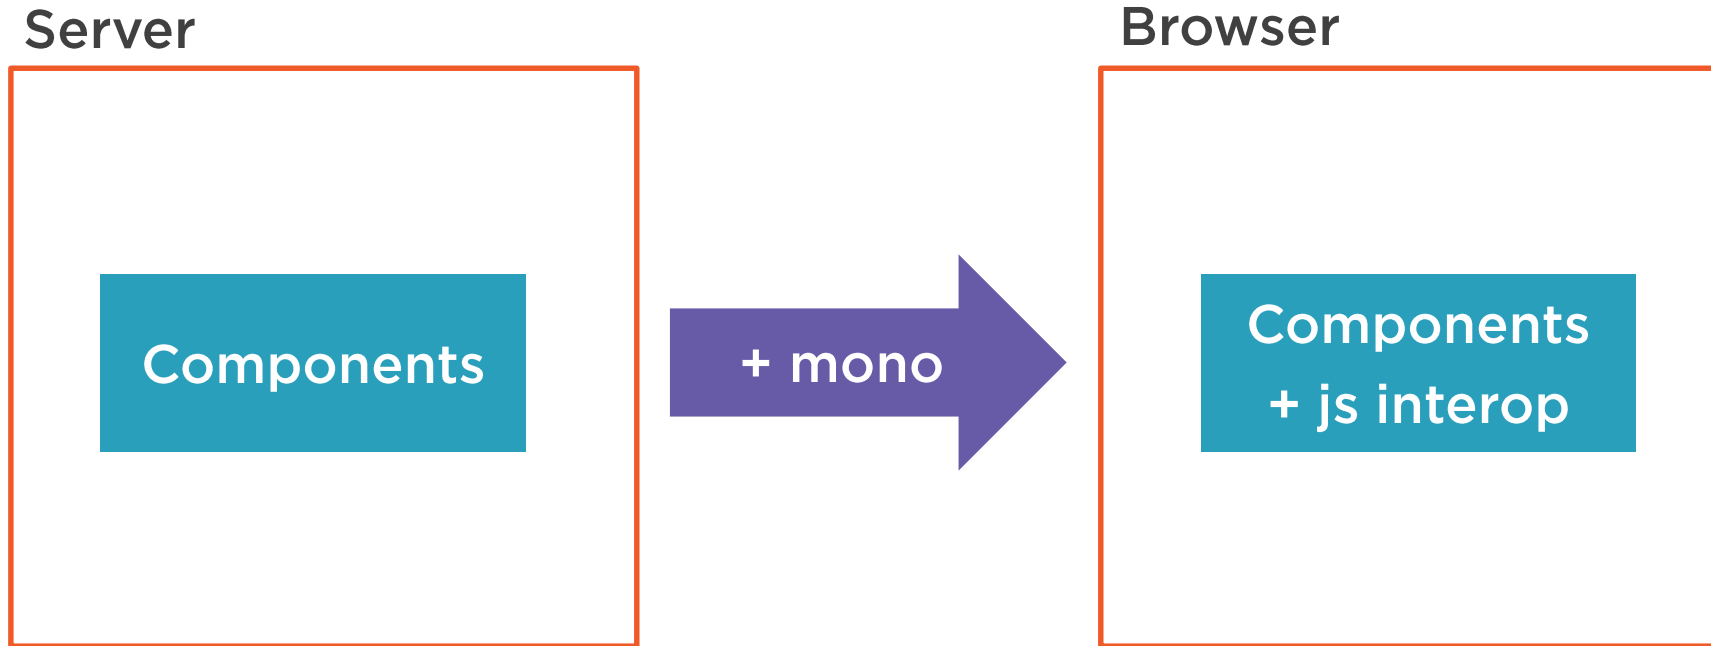

Blazor is a single-page application framework that lets you write C# on the browser side.

Using Blazor ==  
Writing components.

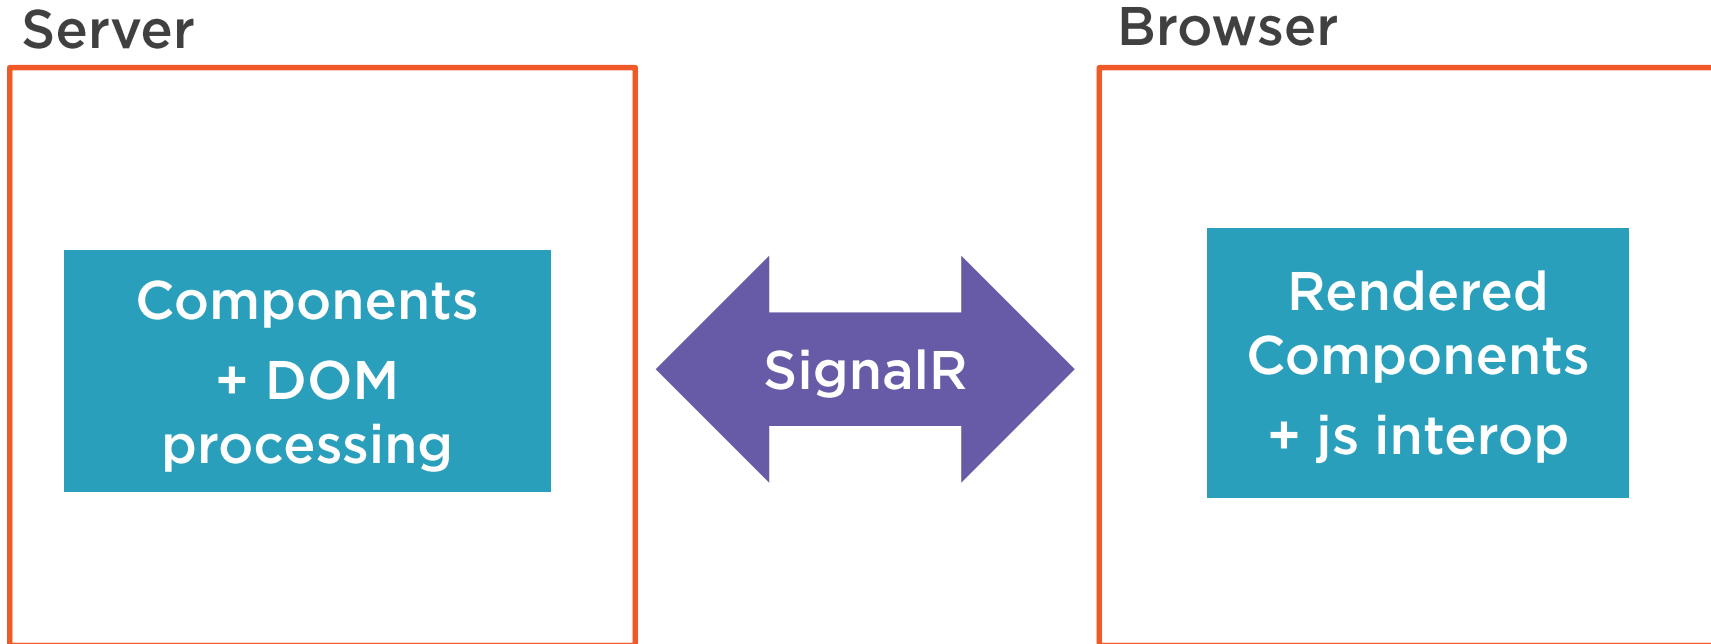

# Hosting Model #1: Client-side

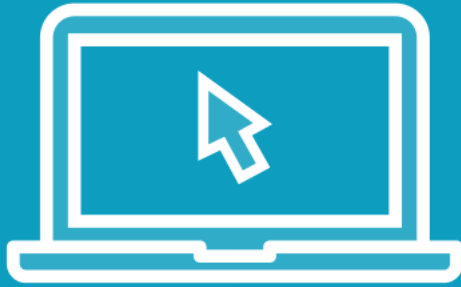

# Hosting Model #2: Server-side

Only server-side Blazor  
is supported  
in ASP.NET Core 3

Demo

The code

# Take Aways

**Blazor is a very powerful mechanism to create single-page applications using C# only**

**Server-side rendering only for now but don't let that stop you!**

# Thanks

---
